# BIRCH™

Rich chestnut brown branches highlighted by tiny leaf buds are the star of this faithfully named décor. Stems are harvested from sustainably grown North American birch trees.

PATTERN TO SCALE

All natural décors are produced using a hand applied technique. Layout and coverage will vary slightly from sheet to sheet due to the artisan nature of the manufacturing process. Some products use natural materials that can change color over time and will vary in size, shape, color and texture within a single sheet. Colors may vary with harvest season.

Birch panels may have a white or amber fog around the branches, which is inherent to the manufacturing process and not considered a flaw.

Thermoforming is not available for this décor.

**SUSTAINABLE FEATURE** | Birch trees are an abundant, rapidly growing renewable resource. Waste produced during processing can be fully recycled into biomass and other wood by-products.
