WANDERLUST

COLLECTION

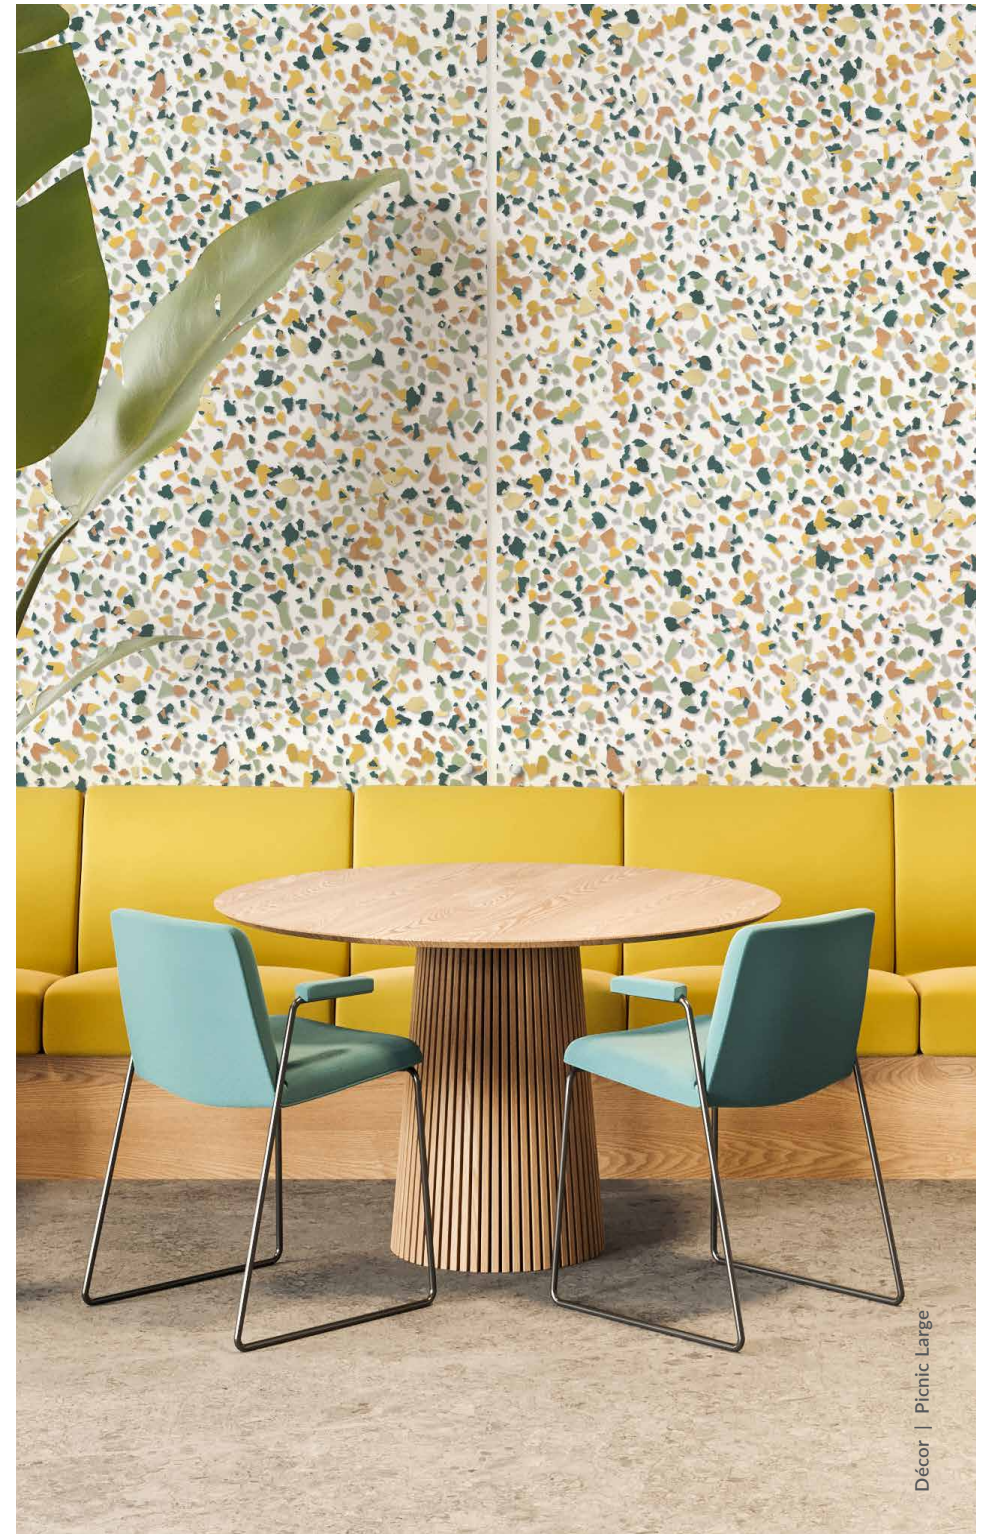

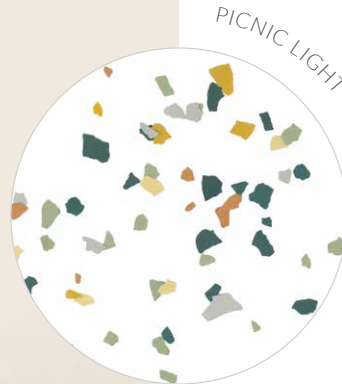

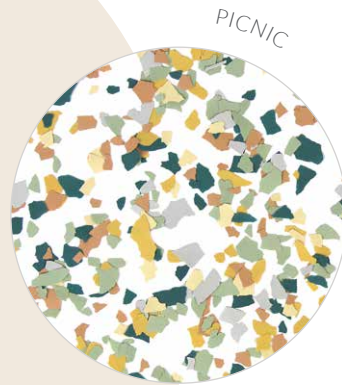

LET IMAGINATION LEAD

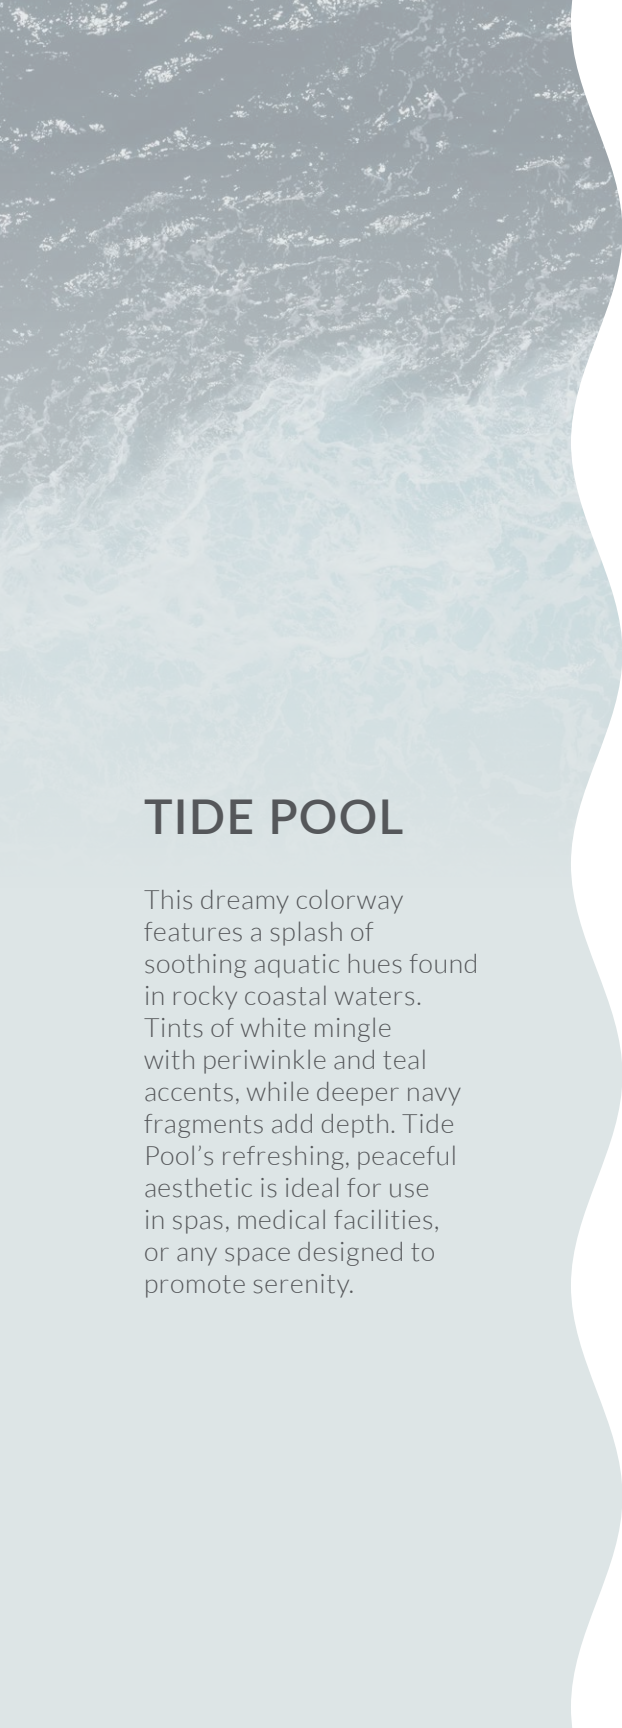

Inspired by classic terrazzo, the Wanderlust collection is a modern reimagining of the beloved material, featuring translucent Resin Panels mottled with color. These dynamically patterned panels offer versatility for applications such as ceiling features, privacy partitions, and more. Open your imagination to new possibilities and explore the collection.

Where will Wanderlust take you?

PICNIC

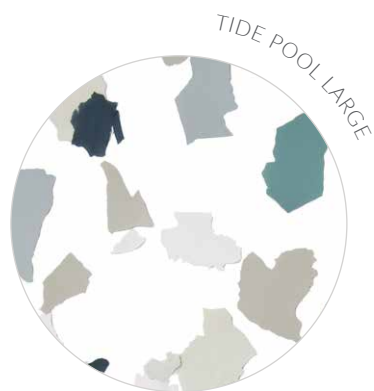

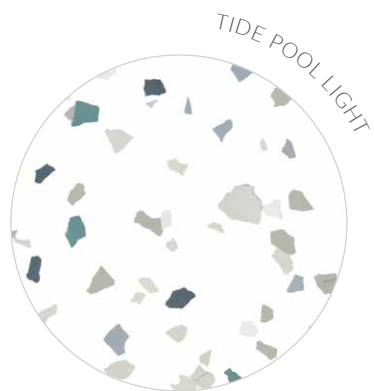

The whimsical, warm, and lively Picnic colorway is defined by its variety of color. Pale terracotta, golden yellow, and mossy green harmonize with cool gray and warm beige, while deep, dark green chips punctuate the palette. Easily integrate Picnic as a statement feature or use it sparingly to elevate neutral environments with vibrant accents.

TIDE POOL

This dreamy colorway features a splash of soothing aquatic hues found in rocky coastal waters. Tints of white mingle with periwinkle and teal accents, while deeper navy fragments add depth. Tide Pool's refreshing, peaceful aesthetic is ideal for use in spas, medical facilities, or any space designed to promote serenity.

SANDCASTLE

SANDCASTLE LIGHT

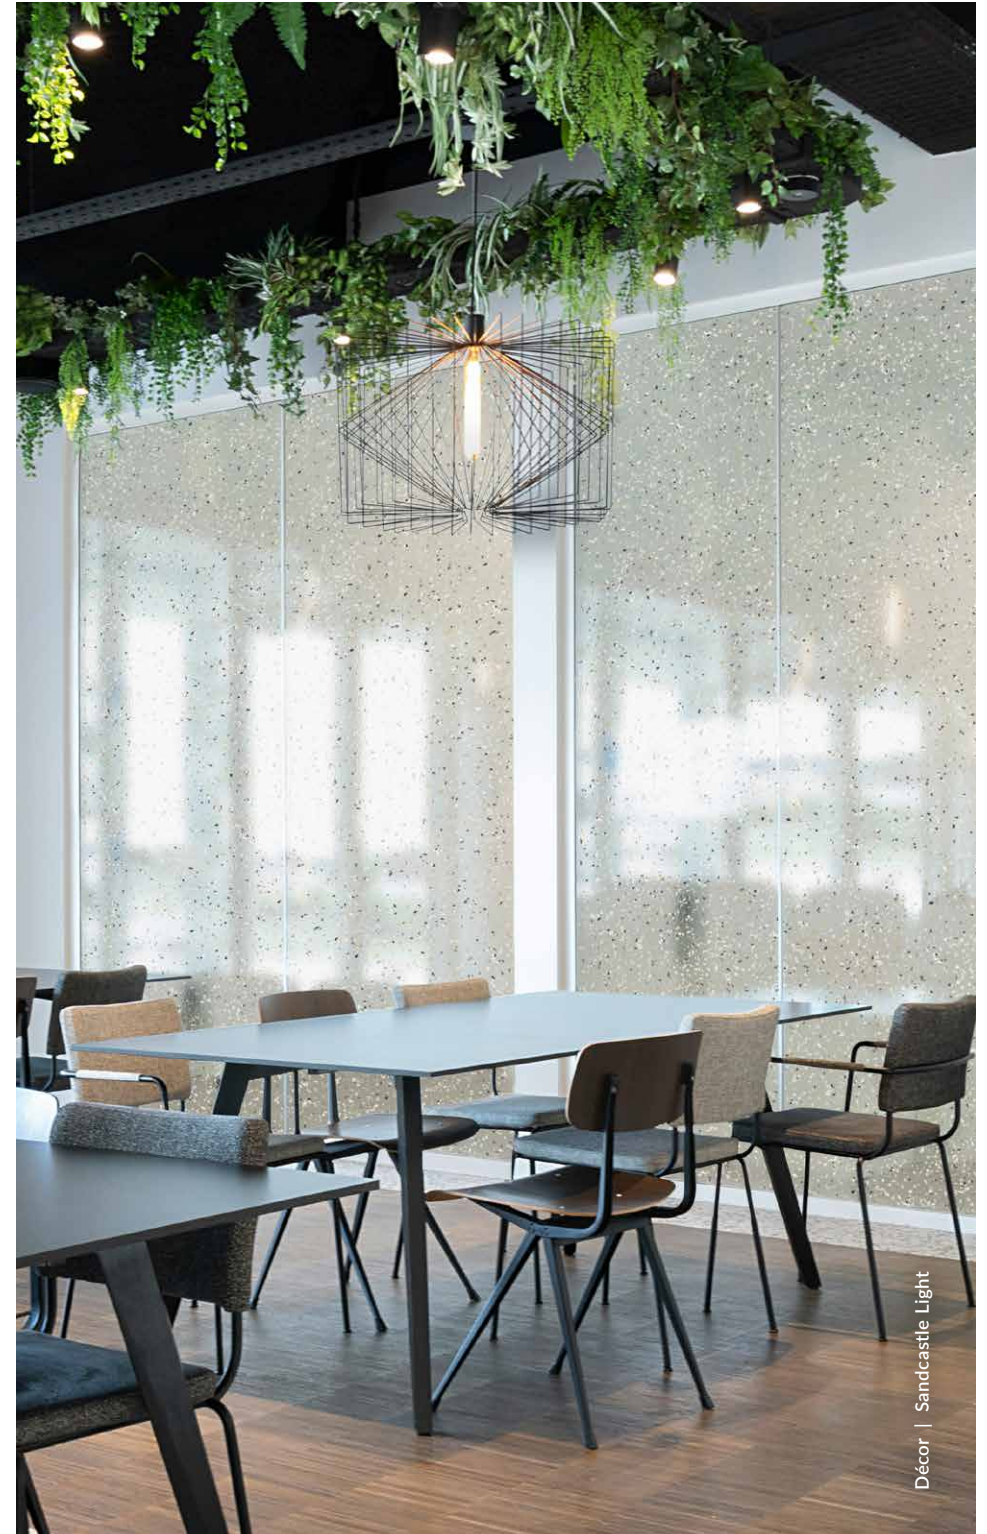

SANDCASTLE LARGE

SANDCASTLE

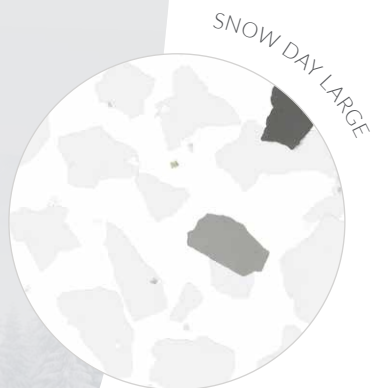

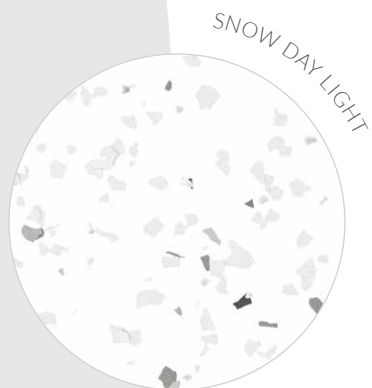

Like sand on the beach, dark grains blend with a medley of soft, natural colors. Tan chips mingle with light gray and white, while charcoal and black accents add depth and contrast. Use Sandcastle to add visual texture to architectural elements such as partitions, tabletops, and more.

Décor | Sandcastle Light

SNOW DAY

Simple, yet elegant, Snow Day shines. Shades of gray intermix with winter white, while metallic flecks shimmer in the light. Charcoal accents add visual weight to the organic pattern, making Snow Day a versatile choice for projects requiring both refinement and subtle texture.

ROAD TRIP

Inspired by the open road, this colorway allows your creativity to travel boldly and push designs even further. A striking blend of asphalt black, concrete gray, and contrasting white chips gives these monochromatic décors a stark, modern edge, making them a perfect choice for contemporary environments.

WAYS TO WANDER

The Wanderlust collection offers three distinct décor varieties, each adding unique character to your design. The standard décor features densely grouped small color chips, creating a rich, intricate texture, while the light décor offers a more open, airy pattern with less density. For a bolder look, the large décor showcases oversized chips, presenting a striking pattern that stands out even from a distance.

Add depth and dimension to any application or environment by specifying different décors within the same colorway, introducing subtle variations in texture and visual interest to your design. For even more dynamic applications, incorporate Luminous Add-ons to infuse vibrant color in the negative space for an eye-catching effect.

Looking for something unique? Talk to your rep about creating custom color blends for special projects. Whether it's matching a brand's palette or designing a one-of-a-kind feature, our team can collaborate with you to bring your vision to life.
